ABOUT THE ALBUM

AXIOM is the new album from Oscillotron. 60 minutes of dystopian drones and synthetic soundscapes, accompanied by a 20-minute Bandcamp-exclusive bonus demo track from 2024 — the raw beginning of the **AXIOM** project.

AXIOM brings together every side of Oscillotron so far: drone doom, heavy synth-driven prog and ambient, woven together through a cold, dystopian, synthetic filter. The album is built around long-form pieces, from the 12-minute *Prime Neuron Disintegration* to the 20-minute centrepiece *Colossal Suspended Tensor Nexus*.

ABOUT OSCILLOTRON

Oscillotron is the solo project of Swedish musician **David Johansson**, frontman of the doom/sludge band **Kongh** since 2004 and touring guitarist of **Cult of Luna** between 2013 and 2019.

Founded in 2012 as an outlet to explore horror, electronic music, ambient and analogue synths, Oscillotron released two albums on CD/LP through Cineploit, *Eclipse* and *Cataclysm*, and played a handful of shows, including opening for Perturbator on their first Swedish show in 2016. Then came a long hiatus.

Oscillotron returned in 2024 with *Oblivion*, an extreme, experimental album of drone doom and extreme minimalism. 2025 brought the minimalist dark ambient EP *Cenotaph*, the eerie, horror-tinged album *Sniezna*, and a full new mix and deluxe edition of the debut, *Eclipse*.
